

HOSTEL MANAGEMENT SYSTEM

❖ INTRODUCTION:-

This application has been developed to provide the facility of hostel management. It provides services of entering new student's records. The details of student like name, age, date of birth etc are to be entered in the prescribed format. In the date format you must use "/" while entering date of birth. You can also alter the previously entered records as well. The format of entering the new record is alphabetical and in place of space you can use underscore(_). You can view the details of the student by using either by student name or roll number. By entering hostel name, you can view the details and information of all the students of a particular hostel. You can also delete the existing records with the help of roll number.

❖ TECHNOLOGY USED:-

- IDE used :- Code::Blocks
- Programming Language used:- C Programming

❖ ABOUT DEVELOPER:-

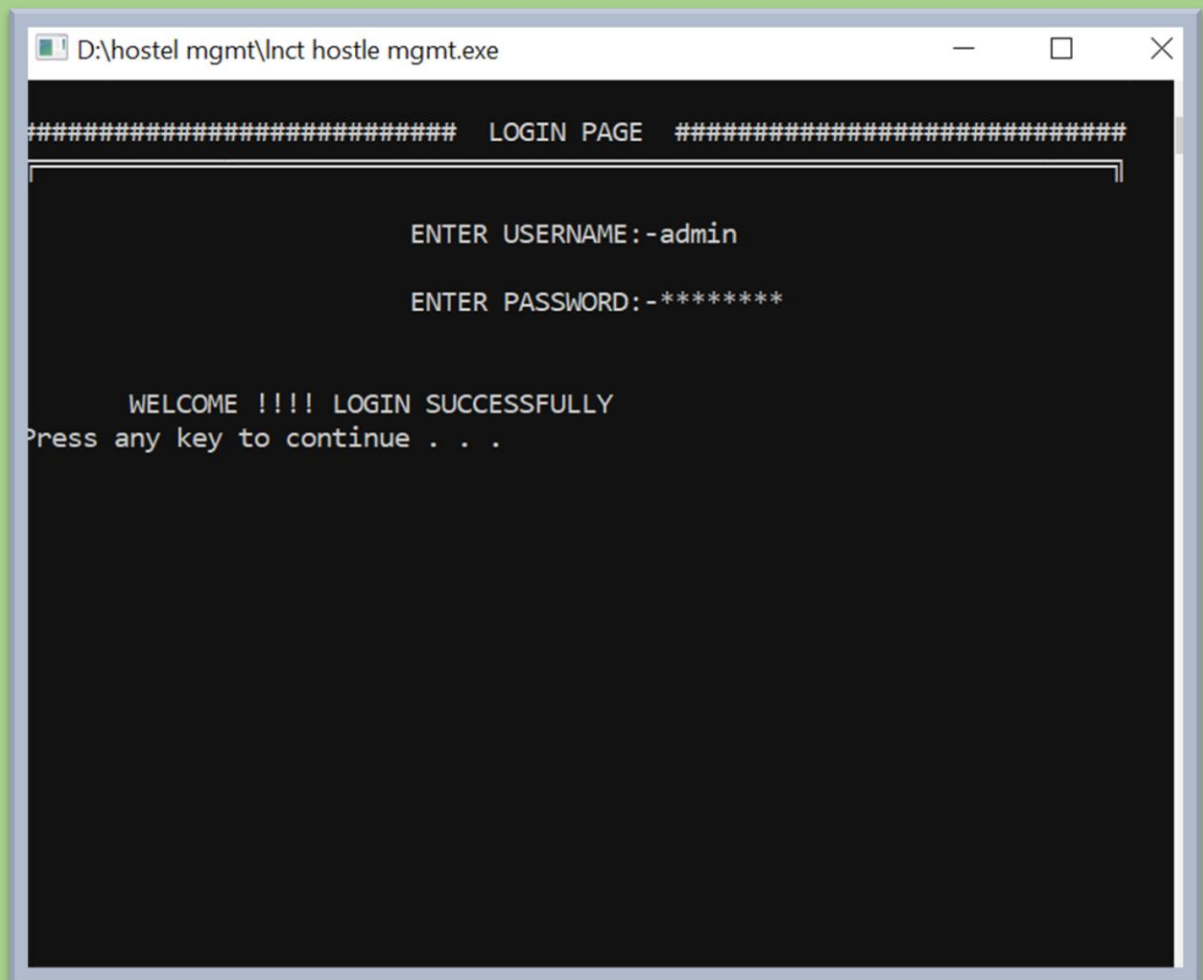

This application is developed by **Abhishek Sharma**. Developer is an student of LNCT College and pursuing MCA. For further queries you can contact me via-

Email:- imgeekabhi@gmail.com

LinkedIn :- <https://www.linkedin.com/in/abhishek-sharma-7234b1188/>

GitHub :- <https://github.com/imgeekabhi>
